PROFILE

student passionate about artificial intelligence, fintech, and tech solutions with social impact. Self-taught and curious, I have developed strong skills in backend development, AI, and embedded systems. I seek to contribute to innovative projects that combine technology and concrete impact, particularly in Africa.

EDUCATION

BACHELOR'S DEGREE IN EMBEDDED SYSTEMS AND IOT

2023 - Present

INSTITUTE FOR TRAINING AND RESEARCH IN COMPUTER SCIENCE

SCIENTIFIC BACCALAUREATE

2023

COLLEGE CATHOLIQUE D'AZOVE

SKILLS

- C/C++ programming for microcontrollers (Arduino, ESP32)
- Electronic circuit design for environmental sensors
- Integration of CO_2, air quality, temperature/humidity sensors
- Sensor signal processing and data filtering
- Python for data analysis
- Basics of Node-RED for IoT data flows

LANGUAGES

- French: Native
- English: Professional Proficiency

PROJECT EXPERIENCE

BACKEND DEVELOPER

2023-2025

NETCOP SARL

- Developed and maintained RESTful APIs for web applications
- Designed and optimized MySQL databases
- Implemented secure authentication systems
- Participated in code reviews and technical documentation
- Collaborated with frontend team for feature integration

AI DEVELOPER

2023-2025

NETCOP SARL

- Developed an algorithm to detect abnormal emission spikes
- Implemented unsupervised learning on historical industrial data
- Created automated alerts with anomaly classification
- Technologies: Scikit-learn, Pandas, Node.js

STEM EDUCATION INNOVATION INITIATIVE | RÉUSSITE SCOLAIRE GROUP

- Co-Founded educational technology nonprofit serving 50+ students across Benin
- Implemented ICT-enhanced curriculum improving STEM proficiency
- Led team of 7 educators in developing adaptive learning methodologies
- Technologies: Digital Education Platforms, Curriculum Design, Data-Driven Pedagogy
